Pflugerville, Texas 78660

OBJECTIVE	Full-time for May 2027
EDUCATION	Texas A&M University , College Station, Texas <i>Bachelor of Science in Computer Engineering</i> , May 2027 GPA: 3.477
COURSES	Program Design C++ (Honors), Data Structures and Algorithms, Intro to Digital System Design, Electric Circuit Theory (Honors), Computer Architecture & Design (ARMv8), Advanced Computer Architecture, Intro to Computer Systems, Signals & Systems, Foundations of Software Engineering, Electronics, Microprocessor Systems Design, Digital Integrated Circuit Design(Honors), Operating Systems(Fall 2026), Computer Networks(Fall 2026), Intro VLSI System Design(Fall 2026), Computer Architecture Capstone Project(Fall 2026)
SKILLS	Programming: C/C++, Python, JavaScript, Java, Go, Claude, OpenRouter Libraries/Frameworks: Pytorch, Matplotlib, Numpy, Excel Tools: Github/Git, Jupyter Notebook, Google Colab
CERTIFICATIONS	Artificial Intelligence Fundamentals - IBM Skillsbuild Machine Learning with Python - IBM (Coursera)
EXPERIENCE	IBM Back-End Developer Intern , Houston, June 1st to August 14th, 2026 - Developed an internal Test Automation Analyzer using IBM Bob to analyze logs, identify issues, and streamline Jira defect creation, reducing review cycle time from 14 days to 2 days (86%) and achieving approximately 7× faster turnaround. - Automated test-analysis workflows that reduced manual investigation from hours to minutes, accelerating root-cause analysis, defect identification, and feedback. - Built AI-enabled automation solutions using IBM Bob, MCP servers, Skills, prompting, Jira integrations, and automated testing, including a server PowerOff project and other internal productivity tools. France Study Abroad , Aix-Paris, May 7th to May 30th, 2026 - Advanced Design and Analysis of Algorithms - Toured and experienced Aix-Marseille University. - Balanced fast-paced content: reading, videos, lectures, and writing while exploring churches and castles. - Gained valuable cultural insight into Europe Japan Study Abroad , Tokyo-Kyoto, May 16th to June 20, 2025 - Computer Architecture and Advanced Computer Architecture - Mirai Innovation Research Institute Company Visit - Attended Advanced AI Marketing seminars - Gained valuable cultural insight into Asia
PROJECTS	Software: - C++: Developed Binary Search Tree, Linked Lists, Priority Queues, Unordered Maps, various Sorting Algorithms, Dungeon Crawling Game, Crazy 8's - Java: Developed the Snake game - ARMv8 assembly: Coding assignments Hardware: - Developed State machines in Verilog on an FPGA (LED Lock, Dynamic Stoplight) - Developed simple single-cycle processor components in Verilog (ALU, Decoder, 2x1 Mux, Sign extender, etc.)
Activities:	Aggie Coding Club (August 2024–Present), IEEE (August 2025–Present), TAMU Datathon (April 2024–Present), Pickleball Club (Aug 2024–Present), and The Big Event (Sep 2024)
INTERESTS	Hardware Restoration for Retro Consoles, Computer Building, Board Games, Gym
